OBJECTIVE

Seeking career growth as a Data Analyst. Looking forward to working with large sets of data to create meaningful visuals, predictions and trends. Experience with connecting to a variety of data sources to build analytical models presented to clients as comprehensive visuals in a dashboard. Competent in creating automated workflows to streamline processes both internally and client-facing.

EXPERIENCE

IT Solution Analyst | Sevan Multi-Site Solutions – Downers Grove, IL (Remote)

2022-PRESENT

- Client Lead for all PowerBI dashboards resulting in improved visibility of data in live time
- Designed all dashboards from scratch with live data connections, optimized for maximum refresh speed and efficient memory usage
- Developed and maintained predictive models to forecast service requirements for retail sites
- Creation of an email bot to automate client processes, setup with Azure using Python for data manipulation of client files, reducing processing by 50%
- Experience developing JavaScript and Python Function Apps that utilize APIs to connect and modify data at the source to integrate into internal systems

Data Analyst | Sevan Multi-Site Solutions – Downers Grove, IL (Remote)

2021-2022

- Professional Services certified and Product certified for Smartsheet; a tabular, no-code software
- Worked as a contractor for Smartsheet to build high-level program management systems for clients
- Wrote and modified SQL statements to efficiently extract data
- Utilized R to import large data sets, clean the data, and visualize the data in meaningful ways

Financial Intern | Total Wealth Planning – Cincinnati, OH

2018

- Used multiple software for managing client data including tax, estate and financial information
- Prepared financial documents for advisors and observed client and prospect meetings
- Leveraged various systems to assess client risk tolerance based on survey results
- Created mass marketing emails for clients to improve search engine optimization

EDUCATION

BA Information Systems, Minor in Business Analytics, BA Marketing |
University of Cincinnati
